Instructions – CPSC2125 Midterm Exam

You will need a remote github repo called exam, and a local folder exam. Initialize a local repo in that folder.

After you finish your work and have pushed to github, please submit your github link.

Fallback option: zip files and submit ZIP archive. Avoid if possible as you will lose points.

Use the two starter files if you like. Scrutinize the screen shots. Add page titles.

Use the techniques from our textbook and/or your special knowledge to create the two pages shown. Pay attention to details like the button color for the submit button, the different font sizes.

When you choose a file name for the home/main page, please pick a name and file extension that is recognized by web servers as a "default document".

Add images to the pages.

For the form, send the data via POST not GET. Use the following link to have your form data processed by a PHP script: https://webdevbasics.net/scripts/pacific.php"

Form example: https://www.tutorialspoint.com/html/html_forms.htm

Special HTML characters

1. copyright in the footer
2. Single tick ' (apostrophe) for contractions (example: You'll)

Hyperlinks

1. Two nav items
2. Email link in the footer. Use YOUR name

Create an external style sheet and link it to both of your pages.

Style Guide

Fonts used: Verdana, Arial, sans-serif;

Colors: https://www.colorhexa.com/

Style the following:

Body and all structural tags. A tag. Img tag. Form, label, input, textarea, button (hint: see next item).

Create and use one new CSS class and one new CSS ID.

Color		Usage
#FCEBB6;		background
#221811;		font
#D2B48C;		Headers, headings, footer, nav font, button
#FEF6C2;		main
